

## Release Notes – Version 1.0

### uMerge Video

1. Relinking to a modified data source does not update the uMerge panel.  
As a workaround, relink to a different data source and then relink again to the modified data source. (BUG-139164)
2. A Style tag cannot be applied to text that already has an animation effect.  
As a workaround, apply the Style tag first and then create the animation. (BUG-139280)
3. Before deploying a project, make sure to save it if any changes have been made to it. (BUG-139245).
4. Tag names must contain either English letters, numbers, or the symbols ‘\_’, ‘-’.

### XVS and API

1. In some cases, when MP3 audio files are used, a jammed sound is created in the final rendered video. (BUG-138432)
2. In some cases, when two sound formats (.wav,.mp3) are used in same project, the soundtrack of the final rendered video is missing. (BUG-139266)
